

SIKA AT WORK

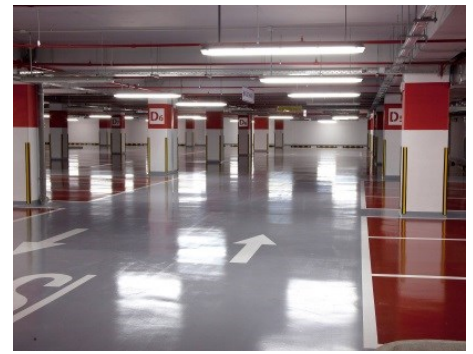

Underground parking area for Shopping Center

FLOORING: Sikafloor®-264

BUILDING TRUST

UNDERGROUND PARKING AREA FOR SHOPPING CENTER

PROJECT DESCRIPTION

The discount shopping center McArthurGlen is located at Spata, covering a 42.000 m² area. It is designed based on neoclassical style, with outdoor cobblestone walkways, numerates 120 shops, cafés, restaurants and a 41.366 m² underground parking area.

PROJECT DEMANDS

The key requirement of the project was the creation of a highly resistant flooring system against intensive car traffic, which should not produce dust, should be liquid impermeable and should be easy to clean. Additionally, the chosen system should be available at a large variety of colour shades, in order to satisfy the architectural design, the labelling requirements and the separation of levels and sectors in the existing space.

SIKA SOLUTION

Sikafloor[®] systems offer a wide variety of solutions at different thicknesses and textures. For the specific demands, the 2-component, coloured, epoxy resin **Sikafloor**[®]-264 was selected, in combination with the 2-component epoxy primer **Sikafloor**[®]-161. The system features include:

- Easiness in cleaning
- Color variety
- Good chemical and mechanical resistance
- Possibility to create an antislip surface
- Glossy finish
- Impermeability against liquids
- Easiness of application and economy

PROJECT PARTICIPANTS

Owner: **McArthurGlen**

Applicator: **POLYCOAT Ltd**

Our most current General Sales Terms shall apply.

Please consult the most recent Product Data Sheets prior to any use and processing.
