LIMITATIONS

• Freshly applied Sikafloor® products must be protected from damp, condensation and water for at least 24 hours.
• Uncured material reacts in contact with water (foaming).
• During application care must be taken that no sweat drops into fresh Sikafloor® products (wear head and wrist bands).
• For exact colour matching, ensure the Sikafloor® product in each area is applied from the same control batch number.
• Under certain conditions, underfloor heating or high ambient temperatures combined with high point loading, may lead to imprints in the resin.

If heating is required do not use gas, oil, paraffin or other fossil fuel heaters, these produce large quantities of both CO₂ and H₂O water vapour, which may adversely affect the finish. For heating use only electric powered warm air blower systems.
