Sika® MonoSeal-101 H Grey
by SIKA Hellas

Health Product Declaration v2.3

created via: HPDC Online Builder

HPD UNIQUE IDENTIFIER: 221669664768
CLASSIFICATION: 07 10 00 Dampproofing and Waterproofing
PRODUCT DESCRIPTION: Sika® MonoSeal-101 H is a mixture of special cements and aggregates, containing waterproof admixtures, that is mixed with water to form a brushable paste.

INVENTORY AND SCREENING NOTES:

Materials listed as Undisclosed is done to preserve integrity of formula and maintain competitive advantage

*Form-Specific Hazard: This substance's GreenScreen Benchmark or List Translator score and the applicable hazards are related to particulate inhalation, which is expected to occur only during manufacture, installation, maintenance, or demolition, due to activities such as sawing, sanding, grinding, or intensive cleaning. For this reason, this score is intentionally omitted from the "Contents highest concern" line above. See HPDC's Special Conditions policy for more information.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- *Basic Inventory method with Product-level threshold.*
- *Nested Material Inventory method with Product-level threshold*
- *Nested Material Inventory method with individual Material-level thresholds*

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

Sika® MonoSeal-101 H is suitable for stiff waterproofing on concrete, masonry and rendered substrates. It is suitable for waterproofing in cases of either negative or positive pressure. Some typical examples of Sika® MonoSeal-101 H waterproofing include the following:
- External wall surfaces to be backfilled in the ground
- Elevator shafts
- Basement walls (internal)
- Trenches and pits
- Tanks and basins

CHARACTERISTICS / ADVANTAGES
Efficient, cost-effective waterproofing of existing structures
- Simple, easy application by brush
- High resistance against positive pressure
- Medium resistance against negative pressure
- Good adhesion on many substrates, including concrete, cementitious mortars, stone, e.t.c.
- Approved-certified product for contact with drinking water. Complies with the quality demands from the French Ministry of Health, in accordance with the instructions of the Supreme Council of Public Health of France, regarding its compatibility in contact with drinking water.
- CE certified

APPROVALS / CERTIFICATES
- CE-marking and Declaration of Performance as Surface Protection Product - Coating according to EN 1504-2:2004, Principle 2 (Moisture Control) - Method 2.3 and Principle 8 (Increasing Resistivity) - Method 8.3 according to EN1504-9:2008, based on certificate of factory production control issued by notified factory production control certification body and type testing.
- Certificate of Compliance for contact with potable water (conforms with positive list results, CARSO-Department of Health and Environmental Hygiene of Lyon), dated 29/06/2017, version number 17 CLP LY 040 (grey) and 17 CLP LY 041 (white).
- According to the german specifications DWG 347 & W 320 concerning products in contact with potable water

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and

for compliance with the HPD standard noted.
