

SikaMelt[®]-9674 LV
HMPUR ADHESIVE FOR
FLEXIBLE FLOORING

BUILDING TRUST

SikaMelt[®]-9674 LV

SikaMelt[®]-9674 LV reactive hot melt polyurethane (HMPUR) adhesive is designed for bonding flexible flooring such as PVC to foam laminates.

It's very high initial strength and fast setting performance creates an efficient production and because it is a reactive type, it cures to form a durable elastomeric bond for tough applications.

FEATURES AND BENEFITS

- High ageing performance for long term durability
- Low fogging and emission levels for building environments
- High initial strength for efficient productivity

Technical data

Chemical base	HMPUR
Application temperature	100 to 160°C
Viscosity	12.000 mPa.s at 130°C
Colour	White - beige, opaque
Density	1.2 kg/l approx.

Our most current General Sales Conditions shall apply.

Please consult the most current local Product Data Sheet prior to any use.
