### APPLICATION METHOD / TOOLS

Hole cleaning is an important part of all installations and has a detrimental effect on the performance of the anchorages. A combination of correct diameter brush and compressed air (compressor or hand pump) must be used to clean holes.

Sika's range of hole cleaning brushes has been specially designed to give optimum hole cleaning performance for adhesive anchor applications. For thorough instructions on hole cleaning refer to the product data sheets and method statement.

The drill hole must be thoroughly cleaned with the special original AnchorFix® brush.

The diameter of the brush must be larger than the diameter of the drill hole.

Insert the brush to the very end of the drill hole. Pull the brush out. Repeat this procedure.

Do not use other cleaning brushes than the original ones.

### INSTALLATION PROCEDURE

For detailed installation procedure, check the PDS and Method Statement of Sika AnchorFix® products. Please also refer to approvals and application video.

### FURTHER INFORMATION

The installation limits depends on the applied AnchorFix® product. Please refer to the PDS of the concerned AnchorFix® product.

### BASIS OF PRODUCT DATA

All technical data stated in this Product Data Sheet are

based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

### LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

### ECOLOGY, HEALTH AND SAFETY

This product is an article as defined in article 3 of regulation (EC) No 1907/2006 (REACH). It contains no substances which are intended to be released from the article under normal or reasonably foreseeable conditions of use. A safety data sheet following article 31 of the same regulation is not needed to bring the product to the market, to transport or to use it. For safe use follow the instructions given in this product data sheet. Based on our current knowledge, this product does not contain SVHC (substances of very high concern) as listed in Annex XIV of the REACH regulation or on the candidate list published by the European Chemicals Agency in concentrations above 0.1% (w/w).

### LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied

under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
