APPLICATION INSTRUCTIONS

APPLICATION

Application Guidline:

Based on the valid installation instructions of the relevant roof waterproofing membrane.

Application Method:

Prepare seam areas using a white clean cloth soaked with Sarnafil® T Prep. Allow Sarnafil® T Prep to evaporate completely before welding. During seam preparation or cleaning the cloths should be changed frequently to avoid the spreading of dirt.

White cloths will effectively absorb dirt and the colour will not stain the membrane. Use solvent resistant gloves and eye protection glasses during application. Sarnafil® T Prep contains high volatile and flammable solvents. Application in closed rooms is allowed only with sufficient room ventilation. Smoking and open fire are not permitted.

LIMITATIONS

Avoid contact to materials that are not resistant to solvents.
