8.2 Exposure controls

Engineering measures

Maintain air concentrations below occupational exposure standards. Ensure adequate ventilation, especially in confined areas.

| | - | | | | |
|---------------------------------|--|--|--|--|--|
| Personal protective equipment | | | | | |
| Eye/face protection : | Safety glasses with side-shields conforming to EN166 Eye wash bottle with pure water | | | | |
| Hand protection : | Chemical-resistant, impervious gloves complying with an ap- proved standard must be worn at all times when handling chemical products. Reference number EN 374. Follow manu- facturer specifications. | | | | |
| | Recommended: Butyl rubber/nitrile rubber gloves. Contaminated gloves should be removed. | | | | |
| Skin and body protection : | Dust impervious protective suit | | | | |
| | Protective clothing (e.g. Safety shoes acc. to EN ISO 20345, long-sleeved working clothing, long trousers). Rubber aprons and protective boots are additionally recommended for mixing and stirring work. | | | | |
| Respiratory protection : | In case of inadequate ventilation wear respiratory protection. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe work- ing limits of the selected respirator. particulate filter P | | | | |
| | P1: Inert material; P2, P3: hazardous substances | | | | |
| | Ensure adequate ventilation. This can be achieved by local exhaust extraction or by general ventilation. (EN 689 - Meth- ods for determining inhalation exposure). This applies in par- ticular to the mixing / stirring area. In case this is not sufficent to keep the concentrations under the occupational exposure limits then respiration protection measures must be used. | | | | |
| Environmental exposure controls | | | | | |
| General advice : | Try to prevent the material from entering drains or water courses. | | | | |

No special environmental precautions required.
