

HPD UNIQUE IDENTIFIER: 1522533376

CLASSIFICATION: 07 16 13 Polymer Modified Cement Waterproofing

PRODUCT DESCRIPTION: Sikalastic®-152 HP is a two component fibre-reinforced mortar, with very low elastic modulus, based on cement modified with special alkali-resistant polymers, containing fine particle size selected aggregates and adequate additives for waterproofing and protection of concrete subgrades subject to flexural strain. Sikalastic®-152 HP is particularly advisable for application in humid environments or low temperature conditions.

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

INVENTORY AND SCREENING NOTES:

Materials listed as Undisclosed is done to preserve integrity of formula and maintain competitive advantage

*Form-Specific Hazard: This substance's GreenScreen Benchmark or List Translator score and the applicable hazards are related to particulate inhalation, which is expected to occur only during manufacture, installation, maintenance, or demolition, due to activities such as sawing, sanding, grinding, or intensive cleaning. For this reason, this score is intentionally omitted from the "Contents highest concern" line above. See HPDC's Special Conditions policy for more information.

VOLATILE ORGANIC COMPOUND (VOC) CONTENT

Material (g/l): <1 Regulatory (g/l): 100

Does the product contain exempt VOCs: No

Are colorants available that do not increase the VOC content of the base paint when tinted: N/A

CERTIFICATIONS AND COMPLIANCE See Section 3 for additional listings.

VOC emissions: Emission EC1 PLUS- very low emission

VOC content: SCAQMD Rule 1113 Architectural Coatings - Concrete curing compounds, Industrial Maintenance (IM) Coatings, Zinc-Rich IM Primers, Primers, Sealers, and Undercoaters, including Quick-Dry Primers, Sealers, and Undercoaters and Specialty Primers, Rust Prevent

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

SIKALASTIC®-152 COMP A

#: 70.0000 - 80.0000

PRODUCT THRESHOLD: 1000 ppm RESIDUALS AND IMPURITIES EVALUATION COMPLETED: Yes MATERIAL TYPE: Polymeric Material

RESIDUALS AND IMPURITIES NOTES: Residuals and Impurities are determined based on information provided in supplier documentation. All residuals and impurities within the threshold are included.

CERTIFICATION AND COMPLIANCE NOTES: Product Type declared by SCAQMD 1113 is Waterproofing Sealers		

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

USES

- Waterproofing and protection of hydraulic structures such as: basins, tanks, swimming pools, concrete piping, bridges and canals
- Waterproofing and protection of outer walls to be buried into the ground
- Inside waterproofing of light counter pressure water, of walls and floors in basements
- Waterproofing of terraces and balconies with concrete or old tiles subgrades
- Waterproofing of weather exposed surfaces
- Protective, flexible, anti-carbonation coating of concrete surfaces also damaged from plastic and hydraulic shrinkage
- Flexible coating of concrete structures, also subjected to flexural strain
- Concrete surface protection, in accordance with the following EN 1504-9. Principles: 1: protection against ingress (coating); 2: moisture control (coating); 8: increase of resistivity (coating)

CHARACTERISTICS/ ADVANTAGES

- Flexible waterproofing and concrete protection with one product
- Reliable application also in very humid environment
- Applicable also on lightly humid subgrades
- Non sagging: easy application also on vertical walls
- Fast curing (also at low temperature)
- Crack bridging properties
- Excellent adhesion onto almost all subgrades, such as for instance concrete, cement mortars, stone, ceramics, bricks and wood
- High resistance against de-icing salts and carbon dioxide

APPROVALS/ STANDARDS

- Fiber reinforced, two component, cement based mortar for waterproofing and concrete protection according to EN 1504-2, Principles 1,2 and 8 (Methods

1.3, 2.2, 8.2 of EN 1504-9)

- 2-component, cementitious mortar for waterproofing beneath bonded tiles (bonded with a C2 adhesive according to EN 12004) with improved crack bridging ability at low temperature (-200

C) and resistant to contact with chlorinated water, complying to the performance of CMO2P class of EN 14891:2012.

- DoP 020701010020000043 1026, certificated by the Factory Production Control Body 0546 and from the notified lab 01599 and provided with the CE Mark.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and
