# SYSTEM DATA SHEET Sikafloor<sup>®</sup> MultiDur ET-13

# TEXTURED UNICOLOUR EPOXY ROLLER COAT FLOORING SYSTEM

## DESCRIPTION

Sikafloor<sup>®</sup> MultiDur ET-13 is a low solvent containing, coloured epoxy floor covering with thixotropic properties.

## USES

Sikafloor<sup>®</sup> MultiDur ET-13 may only be used by experienced professionals.

- Can be subjected to normal up to medium heavy mechanical and chemical loading
- For production areas, storage and assembly areas or exhibition areas etc.

## SYSTEM INFORMATION

System Structure

## **CHARACTERISTICS / ADVANTAGES**

- Slip resistance
- Good abrasion resistance
- Good chemical resistance
- Easy application

#### Sikafloor® MultiDur ET-13 system (~ 0.5–0.7 mm)

	1. Primer	Sikafloor <sup>®</sup> -156/-161/-160
	2. Top coat	Sikafloor®-7530
Chemical base	Ероху	
Appearance	Textured, gloss finish	

System Data Sheet Sikafloor® MultiDur ET-13 December 2016, Version 01.01 02081190000000045 Available in various colour shades.

nickness ~0.5–0.7mm

## **TECHNICAL INFORMATION**

Abrasion Resistance	~78 mg (CS 10/1000/1000) (7	days / +23 °C) (DIN 53 109 Taber Abrader Test)	
Chemical Resistance	Please refer to the chemical resistance of Sikafloor <sup>®</sup> -7530		
Thermal Resistance	Exposure*	Dry heat	
	Permanent	+50 °C	
	Short-term max. 7 d	+80 °C	
	Short-term max. 12 h	+100 °C	
	Short-term max. 12 h Short-term moist/wet heat* up to +80 °C where exposure is only occasior al (i.e. during steam cleaning etc.) *No simultaneous chemical and mechanical exposure		

#### **APPLICATION INFORMATION**

Consumption	Sikafloor® MultiDur ET-13 system (~ 0.5–0.7 mm)					
	Coating System		Product	(	Consumption	
	Primer		1 × Sikafloor®-156 161/-160	5/-	~0.3–0.5 kg/m²	
	Top coat		1–2 × Sikafloor®-7	7530	~0.5 kg/m² per layer	
Product Temperature	Please refer to th	Please refer to the individual Product Data Sheets				
Ambient Air Temperature	+10 °C min. / +30	+10 °C min. / +30 °C max.				
Relative Air Humidity	80 % r.h. max.	80 % r.h. max.				
Dew Point	Beware of condensation! The substrate and uncured floor must be at least 3 °C above dew point to reduce the risk of condensation or blooming on the floor finish.					
Substrate Temperature	+10 °C min. / +30	) °C max				
	<ul> <li>When performing application work with Sikafloor<sup>®</sup> MultiDur ET-13, the substrate moisture content must not exceed 4 % pbw measured by Tramex.</li> <li>Test method: Sika<sup>®</sup>-Tramex meter, CM - measurement or Oven-dry-met od.</li> <li>No rising moisture according to ASTM (Polyethylene-sheet).</li> </ul>

## PRODUCT INFORMATION

Packaging	Please refer to the individual Product Data Sheets			
Shelf life	Please refer to the individual Product Data Sheets			
Storage conditions	Please refer to the individual Product Data Sheets			

### MAINTENANCE

#### CLEANING

Please refer to the Method Statement Sikafloor<sup>®</sup>-Cleaning Regime

## FURTHER DOCUMENTS

- Sika<sup>®</sup> Method Statement Mixing & Applications of Flooring systems
- Sika<sup>®</sup> Method Statement Evaluation and Preparation of Surfaces for Flooring systems

## LIMITATIONS

- Do not apply Sikafloor<sup>®</sup> MultiDur ET-13 on substrates with rising moisture.
- Freshly applied Sikafloor<sup>®</sup> MultiDur ET-13 must be protected from damp, condensation and water for at least 24 hours.
- The incorrect assessment and treatment of cracks may lead to a reduced service life and reflective cracking.
- For exact colour matching, ensure the Sikafloor<sup>®</sup>-7530 in each area is applied from the same control batch numbers.
- Under certain conditions, underfloor heating or high ambient temperatures combined with high point loading, may lead to imprints in the resin.
- If heating is required do not use gas, oil, paraffin or other fossil fuel heaters, these produce large quantities of both CO<sub>2</sub> and H<sub>2</sub>O water vapour, which may adversely affect the finish. For heating use only electric powered warm air blower systems.

# **BASIS OF PRODUCT DATA**

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

## LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the performance of this product may vary from country to country. Please consult the local Product Data Sheet for the exact description of the application fields.

## ECOLOGY, HEALTH AND SAFETY

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety-related data.

## LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and enduse of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
